

7000 Series, School Bus Flashers

Our patented flasher is designed to meet every conceivable school bus application. The 7000-0000-01 has 16 amp terminal load with over-load protection and installation and connection instructions printed on the flasher's surface. The 7000-1000 modular flasher provides an integrated connector designed to connect to the OEM's wiring harness. The 7000 can be easily adapted for a four-way lamp application.

- Potted internal components
- No moisture, road shock or vibration issues
- The modular style provides a quick connect to the OEM harness
- Mounts with two screws
- 3 year warranty

7301 Series, Ambulance Flasher

This solid-state, heavy-duty flasher is packaged in a compact glass-filled nylon case. The unit measures only 1.90"h x 3.50"w x 4.75"d. The module is fully sealed with epoxy, completely impervious to dirt and moisture.

- Isolated terminals – prevents accidental shorts
- Program up to three lamps per channel
- Easy interchange with competitive models
- Complies with GSA-KKK Specification

7301-0000-00

7701 Series, LED Flasher/Controller Module

This module is designed for (12) 3"x7" or 4"x6" lamps per channel, or (6) 7"x9" lamps. This flasher features three flash patterns: quad-pulse, wig-wag and random. At power up the flasher starts the quad-pulse flash pattern. In all cases channels A-B alternate with channels C-D. Enabling the wig-wag function will override the other flash patterns. Secondary mode disables channel D.

- 3 different flash patterns: Quad, Wig Wag, and Random (Random has 7 different flash patterns)
- Potted internal components
- 16 Amp terminal load

7400 Series, Strobe Power Systems

Six modes of strobe power packs for new or retrofit applications. Power supply for NFPA or GSA-KKK vehicles. User-selectable flash patterns: dual, quad or random flash patterns. Three wire, shielded heavy-duty strobe cable offers connectors installed and is available in various lengths. Operates in 12V or 24V applications.
